Autumn’2016

IT633 Data Mining and Warehousing

pm_jat @ daiict
DMW – how we plan to go about

• Primarily Data Mining (with Data Warehouses as one of the important input source of data for Data Analysis tasks)

• DM tasks (and their methods) will be demonstrated using Top Down approach
  – From black-box to white-box to efficiency and efficacy of DM methods

• Hands on sessions through:
  – Tutorials exercises – manually and through a tool
  – Project (Experimental work / Literature survey)
Texts to be used in the course

Grade Distribution

- Core Concepts: 50%
  (One/two in-semester and end-semester examination)

- Project/Term Paper – 50%
